

I believe it is in the best interest of the public to approve the XM/Sirius merger. I currently subscribe to both services. I enjoy the baseball on XM and EWTN and Football on Sirius. With the combined merger, we would pay less for more programming.

I also feel that XM & Sirius are just one of many options for audio entertainment. I can choose from XM, Sirius, AM, FM, MP3, CD and internet radio such as Yahoo.

The merger would benefit the consumer and companies involved.

If the merger is not approved, and XM or Sirius "Goes Under" than most of the subscribers will subscribe to the surviving entity..... leaving no control.
